**Our path—
Our mission**

Our path – our mission

- Core competence in warehouse logistics in mechanical and plant engineering
- Full-service provider since 1947, active worldwide
- Headquarters in Lauda-Königshofen, 50 employees
- A company of the R.Weiss Group GmbH & Co. KG, Crailsheim

Our mission:

Increased efficiency through global process optimization

Integrated solutions for automated storage and conveying systems

- Sheet metal storage
 - Long goods storage
 - Storage and retrieval unit
 - Coil storage
 - Customized solutions
- 

Portfolio

1. Automation of storage systems
 2. Complete systems
 3. Customized special solutions
 4. System components
 5. Conveyor technology
 6. Handling technology
 7. Robotics
 8. Control, software & warehouse management
 9. Retrofit
- 

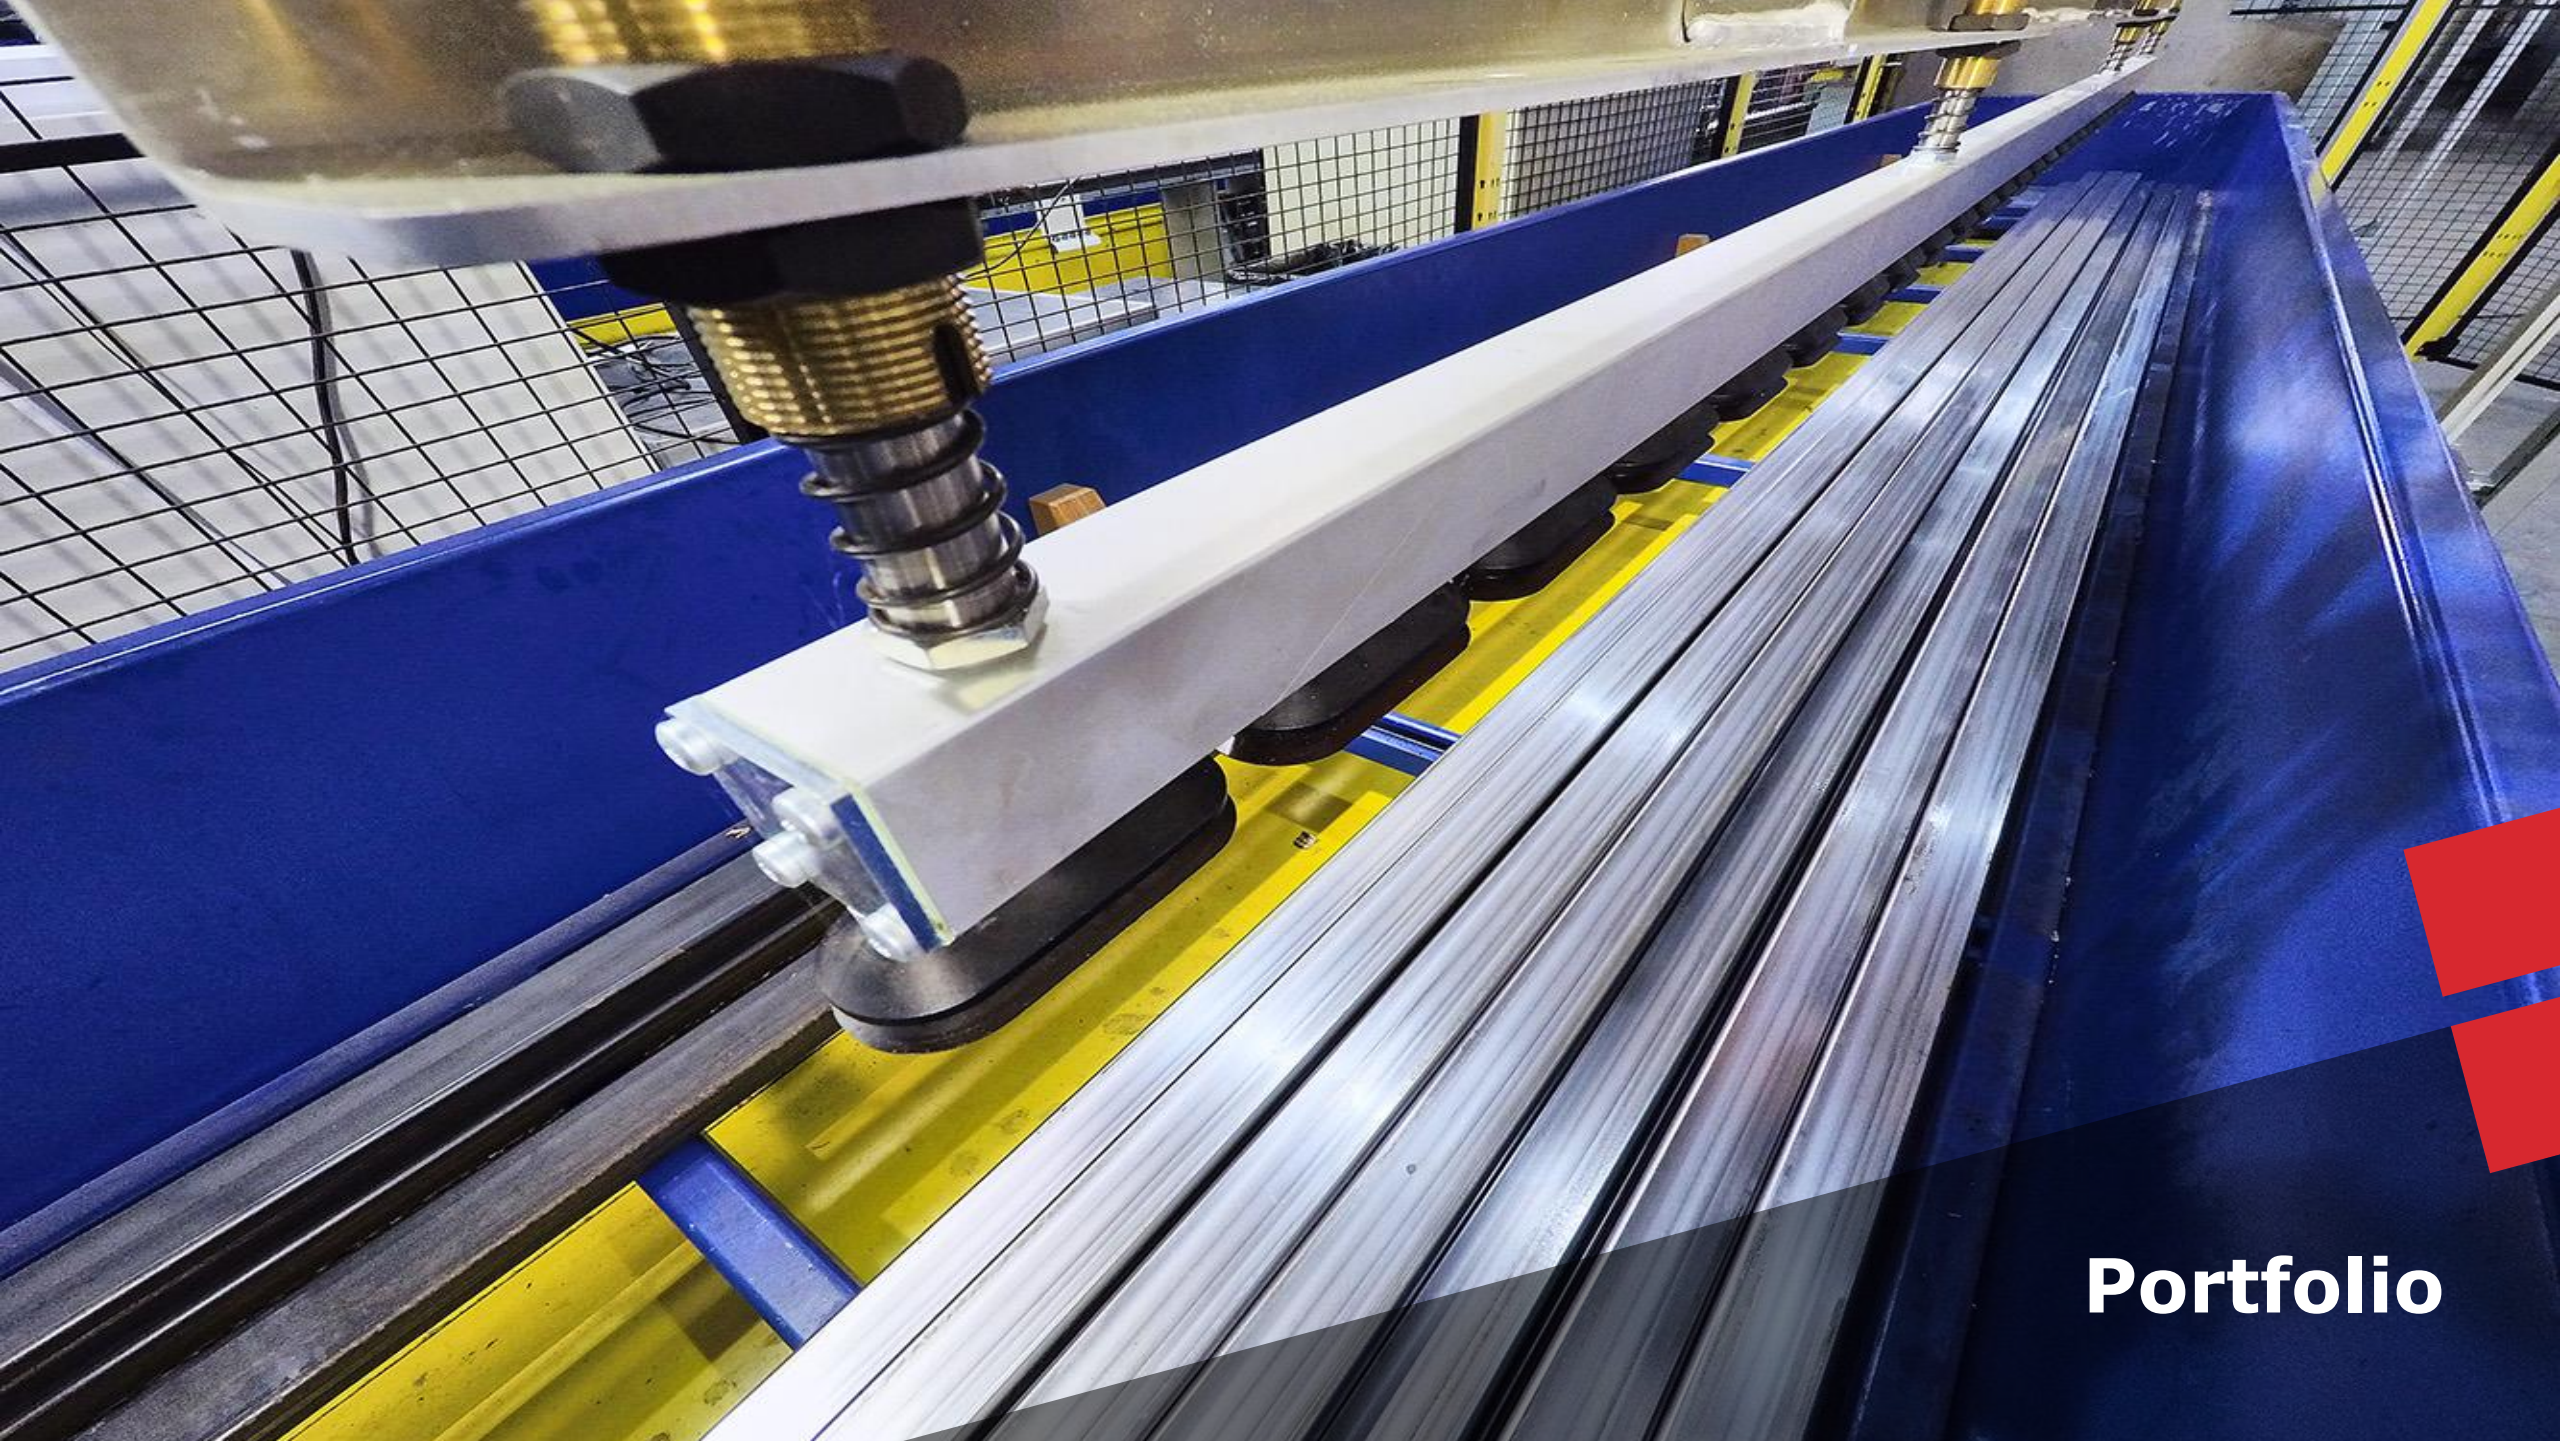

TRAFO

**Comprehensive
support**

Comprehensive support

- Planning
- Development
- Fabrication & Production
- Assembly
- Commissioning and turnkey handover
- After-sales service / retrofit

Portfolio

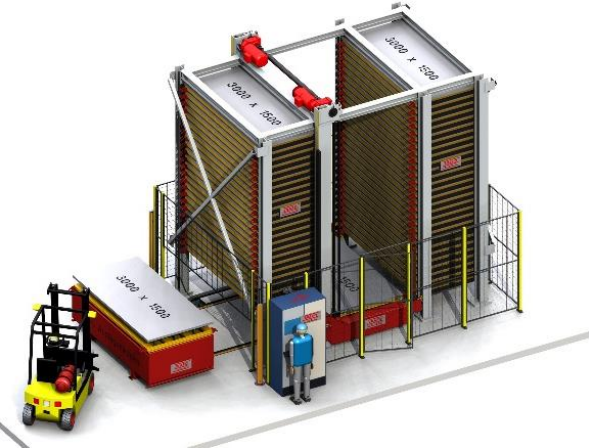

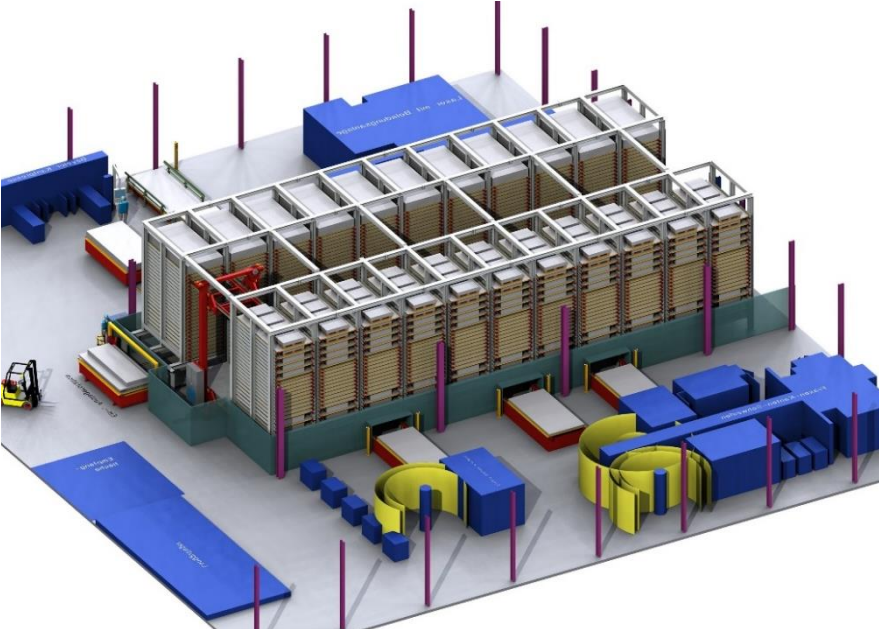

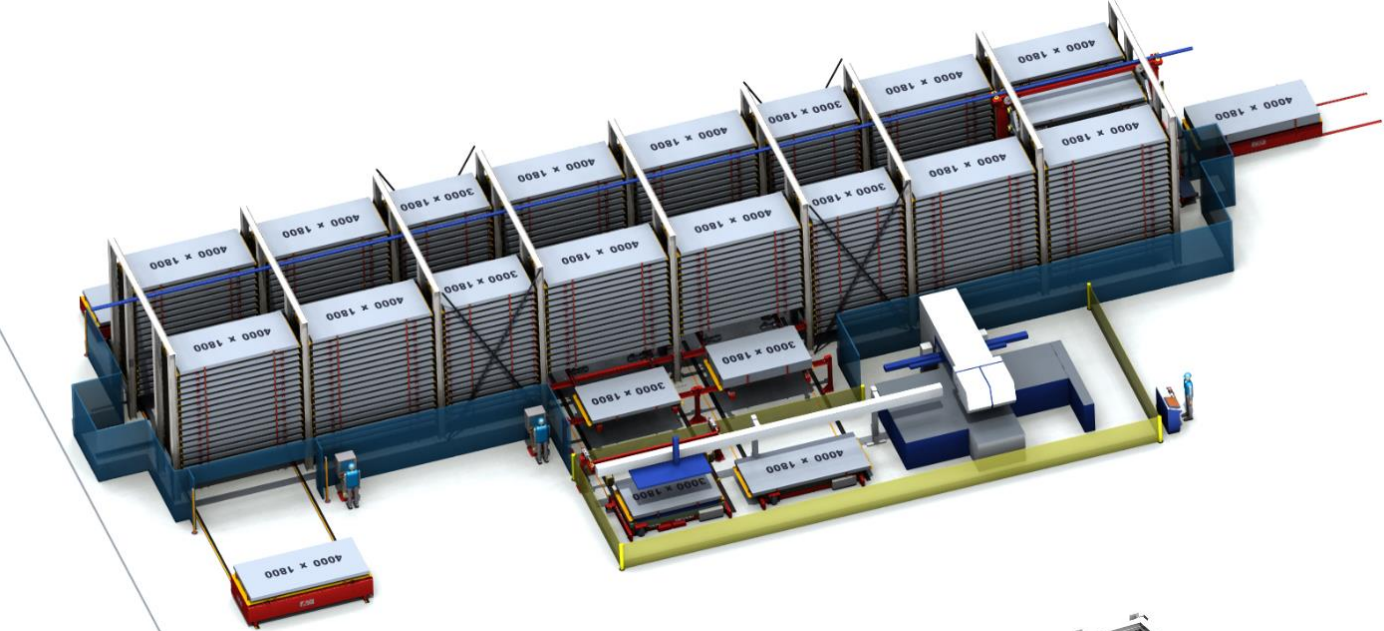

Trafö sheet metal storage system

Various and formats up to 6 x 3m and larger

- Storage technology
- Different formats
- Special size 8 x 2 m
- Payloads from 1 to 25 tonnes per load carrier
- Connection to machines – laser, punching, robotics, etc.
- Stations and conveyor technology for customized applications
- Control, software & warehouse management

Examples of sheet metal storage systems

Example video:

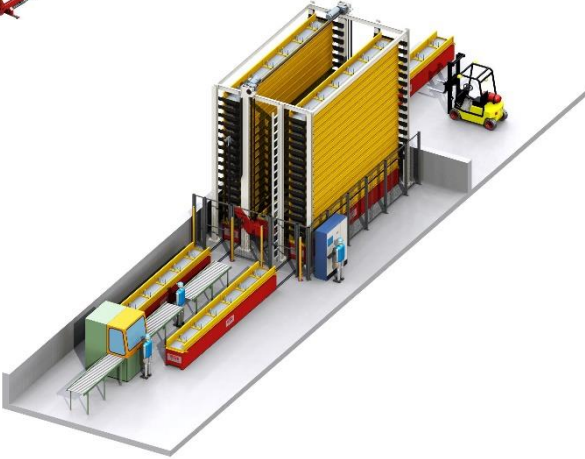

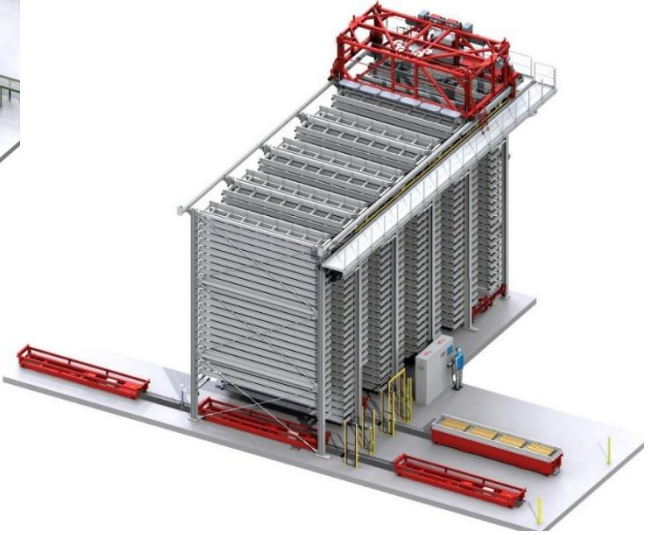

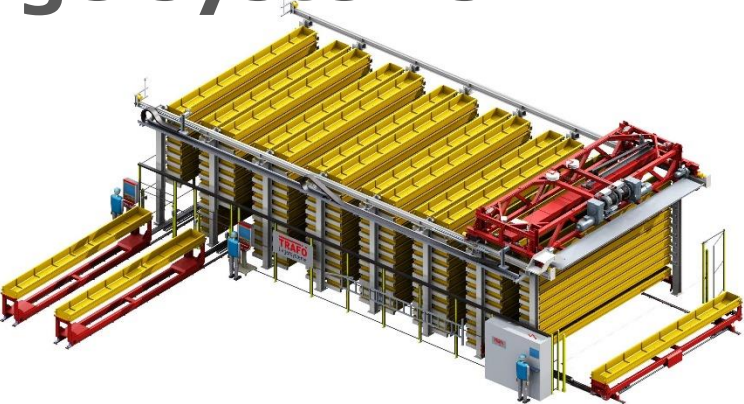

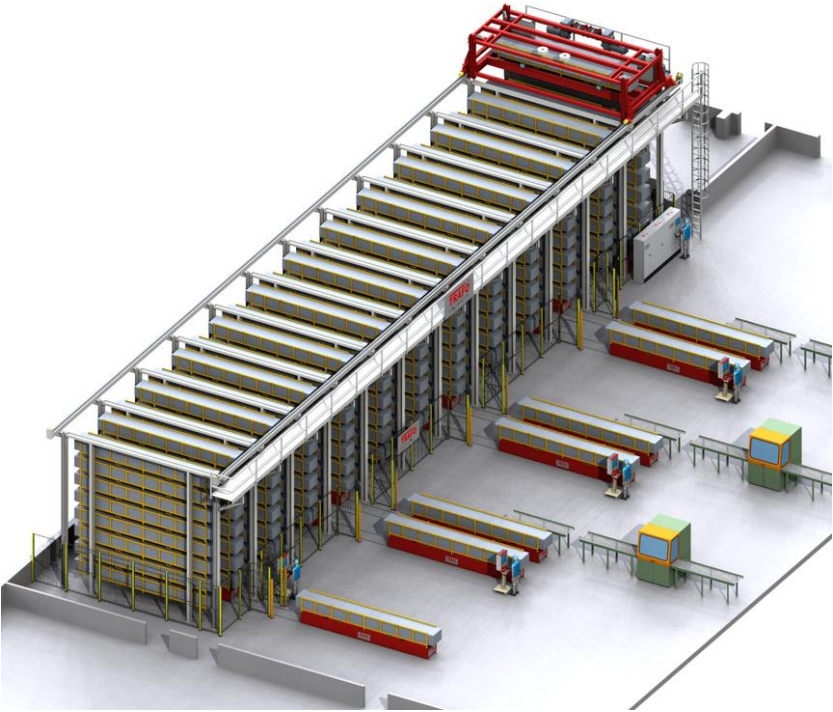

Trafö long goods storage system

Cassette storage, collar storage, single rod storage, etc.

- Storage technology for cassettes, tubes, collars, profiles and single rod
- Bar lengths 3m up to 18m
- Payloads from 1 to 25 tonnes per cassette
- Cassette and load carriers in different designs
- Stations and conveyor technology for customized applications
- Control, software and warehouse management

Example long goods storage systems

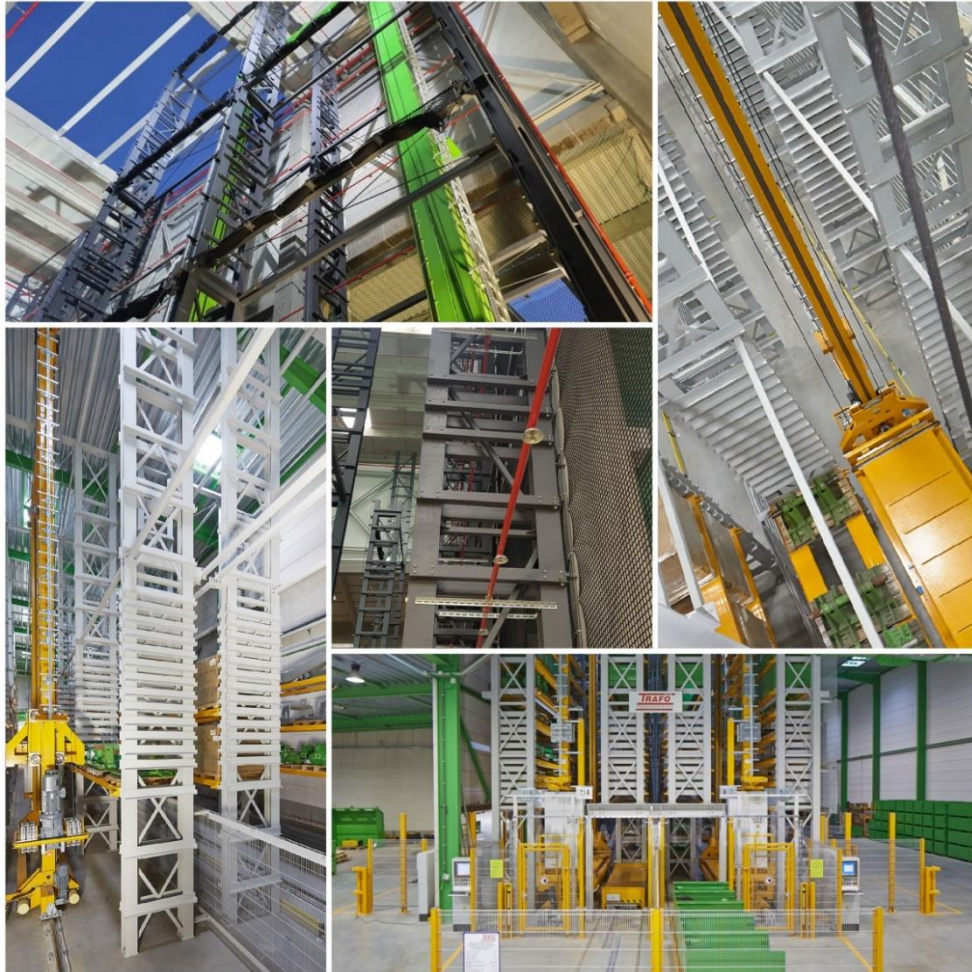

Example video:

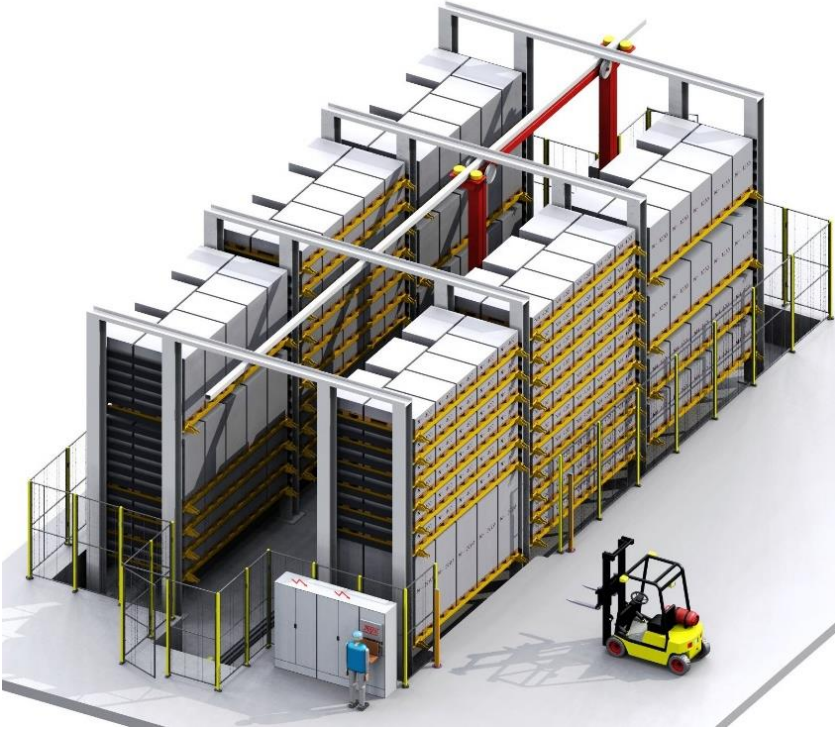

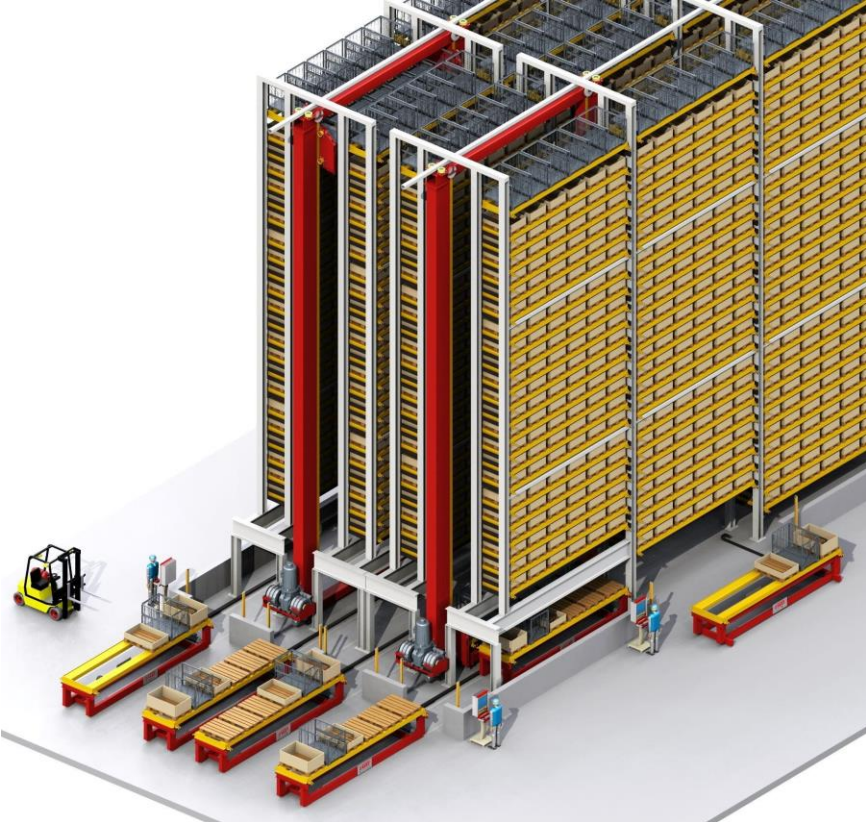

Trafö multifunctional storage system

Boxes, pallets, crates, racks, etc.

- Multifunctional warehouse for different containers and goods
- Pallets, tools, spare parts, boxes, racks, etc.
- Customized design of the load carrier
- Connection to machines
- Stations and conveyor technology
- Control, software and warehouse management

Example multifunctional storage system

Example video:

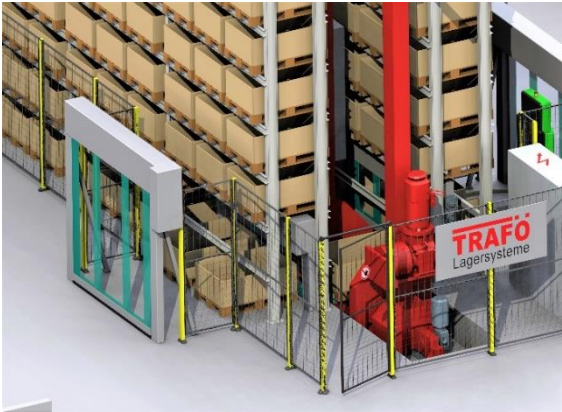

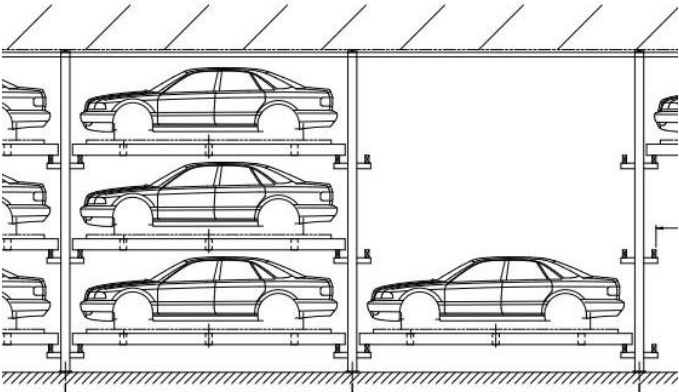

Trafö customized storage systems

Coil, tools, skid, etc.

- Storage technology for coils, tools, special paper, profiles, skids, etc.
- Customized design from steel construction to the load carrier to the feed and discharge technology
- Robotic solutions
- Handling systems
- Conveying and order picking technology
- Control, software and warehouse management

Example customized storage system

Example coil & tool storage system

Technical data:

■ Coil

- Max. shelf load 12000kg
- Max. ø 1500mm
- Max. coil width 1500mm
- Storage locations 37 pieces

■ Tools

- Max. shelf load 10000kg
- Max. Length 2600mm
- Max. Width 2000mm
- Max. Height 740 / 970mm
- Storage locations 100 pieces with usable height 740mm
62 pieces with usable height 970mm

Total storage locations
coil & tool 199 pieces

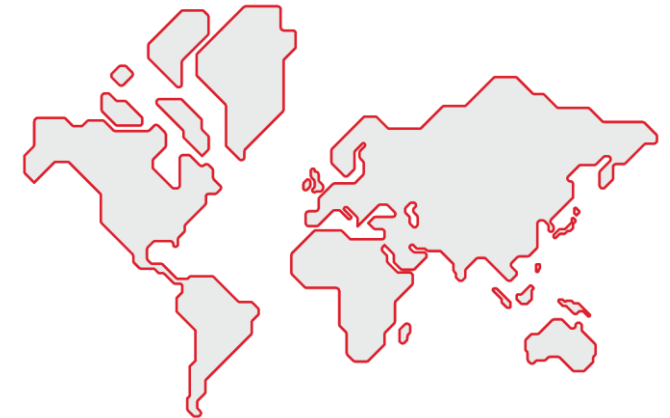

TRAFO

HORMA

Service & After Sales

Service & After Sales

- Installation of the systems – worldwide
- Remote access / service hotline / maintenance
- Supply of spare parts – worldwide
- LVS and LVSlight (warehouse management) with the interface to ERP-systems

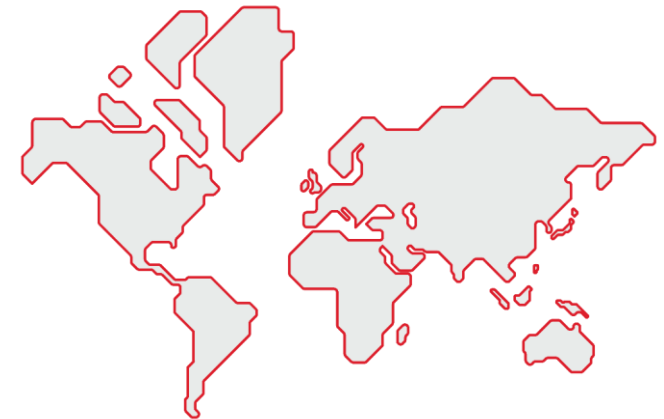

Strategic advantages

Strategic advantages through modern storage systems

Your competitive advantage

1. Differentiation through technology
2. Modularity for flexibility
3. Growth opportunities in various markets
4. Breadth of applicability in various industries

**Your questions, suggestions and wishes are
welcome**
